SUMMARY

Self-taught software engineer who ships real products. I run a small web studio and am currently building **two active products** in parallel: **LAB301** (the studio platform) and **Mikhalych**, an LLM-powered Telegram sales agent in production. **Fluent English** (5 years living in New York, USA) — comfortable with spec-first, written-first collaboration. Actively learning React, PostgreSQL, REST API design and testing to grow into modern, AI-native engineering.

EXPERIENCE

Founder & Web Developer — LAB301 Digital Studio

2024 — Present

Remote · lab301.ru

- Founded and run a web development studio building websites and AI assistants for small businesses.
- Shipped **5 products to production**, including an LLM-powered Telegram agent with CRM integration.
- All client websites score **GTmetrix Grade A** (90–100% performance).
- Own the full cycle: design, build, deploy (Render / GitHub Pages), SEO and uptime monitoring.
- Acquire clients independently and deliver fixed-scope projects end to end.

PROJECTS

Mikhalych — LLM Sales Agent

ACTIVE

mihalich-ai.ru

Tool-using AI agent on Node.js + Groq LLM. Talks to customers 24/7, qualifies leads and writes structured records to a Notion CRM via API. Custom system-prompt persona; deployed on Render with webhooks/polling and uptime monitoring. Built as a sellable product.

LAB301 — Web Studio Site

ACTIVE

lab301.ru

Studio site I build and maintain; continuously improved and promoted via SEO. GTmetrix Grade A (92%).

[HTML](#) · [CSS](#) · [JavaScript](#) · [SEO](#)

Remcity36 — Appliance Repair Service

remcity36.ru

Corporate site: work gallery, request form, Telegram & WhatsApp integration. GTmetrix Grade A.

[HTML](#) · [CSS](#) · [JavaScript](#) · [SEO](#)

Inari Atelier — Landing · Vladimir Kandinsky — Portfolio

inari-atelier.ru · v-kandinskiy.ru

A tailoring-studio landing (catalog, booking, local SEO) and a custom-design portfolio site for an AI artist.
